

GOFF

Goff, Inc. offering even more Blasting Solutions !

Goff “VB” Versatile Blast Wheel

The latest design by the **Goff** Engineering Group is a durable, cost efficient, maintenance friendly, versatile blast wheel. Goff is pleased to introduce our new “**VB**” Versatile Blast Wheel.

The “**VB**” Blast Wheel incorporates a dove-tail style mount into the single bare wheel design. This configuration requires fewer replacement parts for simpler and easier blast wheel maintenance. The eight straight blade design allows smooth operation and longer wear part life.

The “**VB**” Blast Wheel is available in size ranges of 12”, 13½” and 15” diameter for standard direct drive abrasive velocities ranging from 230 to 290 F.P.S. It is available in base plate mount assemblies to replace less efficient and more costly indirect drive blast wheels as well as other direct drive blast wheels on competitor’s equipment.

The “**VB**” is available in horsepower choices ranging from 7½ - 50 H.P. It is designed to meet all cleaning needs including heavy duty foundry requirements. The Goff “**VB**” Versatile Blast Wheel is the most versatile blast wheel Goff has offered in our 3+ decades dedicated to the abrasive blast cleaning and peening industries.

GOFF, Inc.
Seminole, OK USA

Goff's "VB" Versatile Blast Wheel Features:

Universal Wheel

- **Straight - 8 blade design**
- **Direct drive**
- **Retrofits to many competitive machines**
- **Longer wear part life**
- **Simple replacement part change-out**
- **H.P. ranges from 7½ - 50 H.P.**
- **Sizes: 12, 13½ and 15 inch**
- **Fewer parts for simpler, easier build**
- **Fully cast-lined blast wheel housings**
- **Manganese housings available**
- **Bi-directional operation, less parts to stock**
- **Single runner head dove-tail technology**
- **Low cost operation**
- **Highest quality U.S. cast componentry**
- **BUILT IN THE USA**
